

Yes, we are hiring!

Sr. Technician - Electronics Engineer

1-2 years of experience
Diploma/ITI in Electrical Engineering

Who we are?

Life and Limb is a MedTech company incorporated in 2020 where we innovate, design, and engineer biomedical devices. Our focus revolves around prostheses solutions that are cost-effective, state-of-art and custom-built for each user. We aim to revolutionize this domain with innovative solutions that are accessible, affordable, and aspirational.

We have done pilot testing for our first product — BIONICLI[®], a myoelectric prosthetic hand with fourteen grip patterns that can achieve more than 15% of the activities of daily living. We need your help in replicating the design for customers.

Essential Duties and Responsibilities:

We are looking for a multifaceted team member with skill sets in Embedded Systems Engineering. You should be able to understand our requirements, vision, and aesthetics very well, be strict with the timelines and work cohesively within the team in finalizing the electronics system of the prostheses for which you shall have expertise in Microcontrollers; Protocols; Circuit Building, Analysis, Simulation; Schematic/4 Layer PCB Layout Design; IoT Open Source Development; Component Selection/Data-Sheet Analysis; Interfacing with Sensors, SOCs, ADCs, Wireless/RF, Actuators, Motors and electrical loads; and SMD soldering/Reflow.

Qualifications:

- Minimum of 0-1 year of experience in hardware and PCB designing,
- Knowledge of designing software like EasyEDA/Altium is mandatory, and
- Bachelor's Degree in Engineering or equivalent education or job experience.

Skills, Abilities, and Competencies Required:

- Must have excellent interpersonal and communication skills (verbal and written).
- Willingness to work flexible hours as needed.
- Be able to follow detailed procedures and ensure accuracy and quality in documentation and data.
- Must have the ability to adapt to changing pace within the company, with frequent interruptions.
- Must demonstrate flexibility and willingness to adapt to diverse roles as a member of the core team.
- Willingness to learn needed skills on the job in order to enhance performance.
- Proficient in using Google Workspace.

What's next?

The position is for the Delhi/NCR location with one month of probation, requiring you to sign a confidentiality/non-disclosure agreement and an employment agreement before starting the work.

Are you ready for a wow-ing experience and help us dig deep into the process of building a great team? We need a quick response from you; drop a mail to admin@lifeandlimb.ai with your one-page resume/portfolio.
